

Description of Asthma Data

The dataset contains four variables:

1. *gender*: Gender of the subjects (categorical) {male, female}.
2. *res_inf*: Recurrent respiratory infection (categorical) {no, yes}.
3. *ghq12*: General Health Questionnaire 12 (GHQ-12) score of psychological well being (numerical) {0 to 36}.
4. *attack*: Number of asthmatic attacks per year (count).
